Professional Summary

Entry-level IT and cybersecurity professional with expertise in SIEM analytics, incident response automation, Active Directory administration, and prompt engineering. Demonstrated proficiency in security tool orchestration, enterprise device management, and technical operations in high-uptime environments.

Education

Indiana University Indianapolis	Indianapolis, IN
B.S. Computer Science & Cybersecurity	Expected 2027
Anderson University	Anderson, IN
Cybersecurity Coursework; Cyber Defense Team Member	Fall 2024

Experience

Technical Event Support & AV Operations Specialist	May 2026 – Present
DispatchAV (Contract)	Indianapolis, IN
- Supported multi-day enterprise event production operations with real-time technical troubleshooting and AV equipment management at JW Marriott Indianapolis - Diagnosed and resolved hardware, networking, and connectivity issues under tight operational constraints; coordinated rapid problem-solving in fast-paced environments - Managed AV infrastructure including equipment setup, cable management, configuration, and systematic post-event teardown with inventory organization	
Information Technology & Cybersecurity Analyst	June 2023 – Present
28th Street Church of God in Christ	Indianapolis, IN
- Administer Active Directory, Microsoft 365, and enterprise user accounts for 50+ users; manage access controls, device deployment, and workstation configuration - Perform SIEM-based threat analysis using Splunk, conduct IOC investigations via VirusTotal, and execute incident response workflows with structured playbooks - Diagnose TCP/IP, DNS, and network connectivity issues; deploy and maintain VMware virtualized infrastructure for security operations - Engineer technical documentation, support procedures, and end-user training materials; drive workflow optimization initiatives	
Prompt Engineer & AI Systems Developer	Present
Independent Projects	Remote
- Design and optimize large language model prompts for technical automation, security analysis, and incident response tasks - Leverage API orchestration and structured output generation to build intelligent automation workflows and decision-support systems - Fine-tune prompt architectures for accuracy, reducing false positives in security alerting systems and improving response efficiency	
Information Technology Technician	Aug 2024 – Jan 2025
Anderson University	Anderson, IN
- Delivered Level 1/2 technical support for hardware, software, and enterprise mobile device troubleshooting across Windows and iOS ecosystems - Assisted with desktop deployment, system imaging, workstation configuration, and Active Directory administration; managed device lifecycle and MDM integration - Documented technical issues and remediation solutions for internal knowledge base; contributed to IT infrastructure support tasks	

Technical Skills

Security & Monitoring	Splunk SIEM, Wireshark, Suricata, VirusTotal, Incident Response, IOC Analysis, Phishing .
Systems & Administration	Active Directory, Microsoft 365, Windows Server, Desktop Deployment, System Admini
Virtualization & Infrastructure	VMware, Enterprise Device Management, iOS Troubleshooting, Network Troubles
AI & Automation	Prompt Engineering, LLM Optimization, API Orchestration, Workflow Automation, Structured C
Additional	Technical Documentation, NIST Cybersecurity Frameworks, Vulnerability Assessment, Security Audits

Certifications & Activities

Google Cybersecurity Professional Certificate — Coursera (Completed)

CompTIA Security+ — Currently Pursuing

Cyber Defense Team — Anderson University (Active Member)
