SUMMARY

Cybersecurity and IT professional with 3+ years of hands-on experience in Active Directory administration, endpoint support, SIEM-based threat monitoring, and enterprise IT operations. Proven ability to support 50+ users, troubleshoot complex network issues, and document technical processes. Pursuing CompTIA Security+ and a B.S. in Computer Science & Cybersecurity.

TECHNICAL SKILLS

Operating Systems: Windows 10/11, Windows Server, Linux
Systems Administration: Active Directory, Microsoft 365, Group Policy, User Provisioning, System Imaging, Desktop Deployment, MDM Integration, Enterprise Device Management
Networking: TCP/IP, DNS, DHCP, Network Troubleshooting, Packet Capture Analysis, Wireshark
Ticketing & Support: ServiceNow, IT Documentation Systems, Level 1/2 Help Desk Support, Knowledge Base Management
Security & Monitoring: Splunk SIEM, Suricata, VirusTotal, Incident Response, IOC Analysis, Phishing Analysis, NIST CSF, Vulnerability Assessment
Virtualization: VMware, Virtual Machine Configuration, Isolated Lab Environments
AI & Automation: Prompt Engineering, LLM Workflow Automation, API Orchestration

EXPERIENCE

IT & Cybersecurity Analyst June 2023 – Present
28th Street Church of God in Christ Indianapolis, IN

- Administered Active Directory, Microsoft 365, and enterprise accounts for 50+ users; streamlined provisioning and offboarding workflows, reducing access-related helpdesk tickets.
- Monitored security events and performed IOC analysis using Splunk and VirusTotal, successfully identifying and containing phishing incidents using structured response playbooks.
- Diagnosed and resolved TCP/IP, DNS, and network connectivity issues, improving uptime and reducing recurring outage incidents across the organization.
- Deployed VMware virtualized infrastructure for security operations and authored technical documentation that decreased repeat support requests.

Information Technology Technician Aug 2024 – Jan 2025
Anderson University Anderson, IN

- Provided Level 1/2 help desk support across Windows and iOS ecosystems, resolving hardware, software, and mobile device issues with high first-contact resolution rates.
- Assisted with desktop deployment, system imaging, and Active Directory administration during a campus-wide device refresh cycle.
- Maintained internal knowledge base documentation, reducing repeat escalations through consistent troubleshooting procedures.

AV & Technical Operations Specialist May 2026 – Present
DispatchAV (Contract) Indianapolis, IN

- Diagnosed hardware, networking, and connectivity failures under operational time constraints, preventing event disruptions across enterprise-scale productions.

PROJECTS

Cybersecurity Homelab | *VMware, Active Directory, Wireshark, Splunk*

- Built virtualized Windows and Linux environments to practice security monitoring, network analysis, and incident response; configured AD, user management, and network services to simulate enterprise infrastructure.

SYN Flood DoS Investigation | *Wireshark, Packet Analysis*

- Analyzed packet captures to identify denial-of-service attack behavior and documented mitigation recommendations based on traffic pattern findings.

DNS & ICMP Traffic Analysis | *Wireshark, tcpdump*

- Investigated DNS communication failures through packet-level analysis, identified root causes affecting connectivity, and produced structured remediation documentation.

EDUCATION

Indiana University Indianapolis Indianapolis, IN
B.S. Computer Science & Cybersecurity

Anderson University Anderson, IN
Cybersecurity Coursework | Cyber Defense Team Member Fall 2024

CERTIFICATIONS

Google Cybersecurity Professional Certificate – Coursera (Completed)
CompTIA Security+ – Currently Pursuing
