SUMMARY

IT support professional with workplace experience using Active Directory, Microsoft 365, and ServiceNow, plus hands-on support for university users, church technology, and live events. Combines hardware, software, and connectivity troubleshooting with independent Python and AI workflow projects. Informatics student with fully online coursework; available immediately for full-time work, including evenings and weekends.

TECHNICAL SKILLS

IT Support: Active Directory, Microsoft 365, ServiceNow, Windows, Linux, hardware/software troubleshooting.

Networking & Operations: TCP/IP, DNS, connectivity troubleshooting, A/V systems, technical documentation.

AI & Development: Python, JavaScript, API integration, prompt design, structured AI outputs, document processing.

Independent Security Labs: Splunk, Wireshark, tcpdump, VirusTotal, incident analysis.

EXPERIENCE

Data Entry & Logistics Analyst

2026

VTI Specialized

- Maintained shipment, load, and customer data in databases and transportation management systems; cross-checked orders, invoices, and documents for discrepancies.
- Communicated with drivers, customers, and internal teams to clarify information and keep records accurate.

Technical Event Support / AV Operations Contractor

May 2026 - Jun 2026

DispatchAV

Indianapolis, IN

- Supported event equipment setup and teardown; resolved hardware and connectivity issues under live-event time constraints.

Information Technology Specialist

May 2024 - Jun 2026

28th Street Church of God in Christ | Part-time

Indianapolis, IN

Additional role: AV Specialist

Dec 2022 - Jun 2026

- Troubleshoot A/V and network connectivity issues with church staff and supported technology used during services.
- Configured and maintained livestream and service equipment; performed setup and operational checks.

Information Technology Technician

Aug 2024 - Jan 2025

Anderson University | Part-time

Anderson, IN

- Supported students and faculty with Windows devices, network printers, and classroom equipment; prioritized tickets and followed up on open issues.
- Assisted with account setup, password and user-access issues, and workstation configuration.
- Troubleshoot TCP/IP, DNS, and connectivity problems; escalated issues requiring additional support.

SELECTED TECHNICAL PROJECTS

Elauno | *Freight document reconciliation | Python, AI document processing*

- Developed an AI-assisted ingestion workflow for text PDFs, scanned PDFs, and images, with text and vision extraction paths.
- Separated AI field interpretation from Python Decimal arithmetic to compare agreed, billed, and paid amounts.

Draft Jarvis | *Local fantasy draft assistant | Python, JavaScript*

- Built a dashboard combining player data and local rankings, with saved draft state, undo, and manual fallback when live data is unavailable.

Kairos | *Local prediction-market research | APIs, structured AI outputs*

- Developed a research workflow combining market data and schema-constrained AI responses, with paper-trading and forecast-evaluation components.
